How the tour works:

The listings in this tour book are in order by studio location, generally from south to north, starting in Turlock. Map locations are numbered with an **orange box**. 

Drive yourself around to as many as you like. If you're looking for a specific artist, check the alphabetical index on the previous page. Some artists may have changed locations since last year. We encourage you to visit artists that may be new to you when you're in a nearby location.

Studios should be clearly marked with signs. Many studio locations are hosting multiple artists and will have lots of art on display and for sale. Some artists may be demonstrating, or have opportunities for you to try an activity. Most studios are kid-friendly (depending on your definition). Some may have pets safely kept nearby.

The artists would love to sell you some art, but they'd also love to chat with you about their processes and philosophy. Don't be shy about asking questions. Keep this guide for future reference. Artists are happy to hear from their fans year-round.

This interactive version of the tour booklet will give you live links to artist's social media. Keep this copy for future use, in case you wish to connect to your favorite artists!

Welcome to the free digital version of our tour book at www.stanislauseaos.com

My style varies with each subject matter, but one consistency is color. I love vivid, bright colors and try to use them as much as possible to enhances each painting. I do like doing all types of themes and subject matter and am enjoying dabbling in some abstract work. "Variety is the spice of life" so I try to spice it up as much as I can.

As a multidisciplinary artist, I embrace Hybrid Aesthetic, blending encaustic, resin, and digital art to create works that merge realism, abstraction, and pop art. Through fusion art, I combine textures, colors, and styles to push boundaries and evoke emotion, crafting pieces that connect the tangible and digital.

#24 Clay Bedford

My art consists of three forms. One is encaustic painting (uses colored beeswax fused with heat onto wood boards, a technique invented by the ancient Egyptians.) The second is encaustic monoprints where the beeswax is melted on a hot plate and a piece of archival paper is placed over the over the bees wax to lift the print. Both these forms produce unique art. The third form is etchings.
